I am very surprised that they allowed this scam. However, the website was looking good enough so I installed it. I had no experience with whatever they were selling. I thought that I could use the product without spending much. At first the program made the process pretty smooth. However, I found out that this was the text to image converter? Then I found out that the app is free, but they are selling the “data” that was being converted to a price. I never used this software and did not know that the real thing wasn’t free. I had the option of using the trial version and it was giving me the option of 100 images.

However, when I went back to the app, I saw that they had not changed their policy. The trial version is still offering me 100 images and they are now charging me \$39.00 to save images from the web. I don't know why the company is selling a unique product that is 100% free, but they are still charging me on the "value" of the data. As of now, I can't really go back and uninstall the software. I would have uninstalled it if they gave me the option. I had the option of saving 50 images for a week. So I guess it was their way of locking me in the program. At the time I had absolutely no reason to make use of this software, I thought that it was 100% free of charge. The honest fact is that I don't know what I am going to do with the images that I

downloaded and I don't know if they are going to keep them. The only good thing that I am hoping from this is that the company does not start charging me for the data that I downloaded. I had to give them permission to save the images on my computer and they took the program off when I asked them to remove it. I have no idea how I am going to use the images that I downloaded. I'm kind of guessing that I'm supposed to sell them. Re: This is definitely a scam site. There are many different text to image programs out there but ALL of them are free. By all means, feel free to install their software if you have a legitimate interest in it. But don't be fooled by what the site claims. I'd recommend

Visit: Richard Bushman, Professor of History at Columbia University

and author of thirteen volumes on topics ranging from slavery and abolition to the early American republic to twentieth-century history, has died. He was 72. Bushman, a product of an Alabama church-school education, showed a talent early for mastering multiple subjects. His first volume, *Abraham Lincoln*, was published at age 23. Later, at Yale, he was editor-in-chief of the *Yale Review*. He returned to the University of Alabama to teach, then joined the Columbia faculty in 1975. At Columbia, he served as William E. Leuchtenburg professor of history, director of the Columbia Center for Oral History and coordinator of the Columbia Oral History Research Center. Bushman was president of

the Organization of American Historians in 2003-04 and was elected to the National Academy of Sciences in 2004. His most important books appeared during and after the Civil War. The *Genesis of the Underground Railroad* (1988) helped expand the view of the 1850s as a time of enormous opportunity and hope rather than one of repression and imminent death. Theodore Rosenberry of the University of Virginia, writing in *American Historical Review*, called it “fundamentally and clearly the most important account of the birth of the Underground Railroad.” It was a *New York Times* bestseller, was translated into French, and made Bushman (a great fan of the work of

Richard Wright) a household name in Europe. Kenneth C. Davis, author of *Myths of the American Presidency* (1989), asserted that “it remains the best account of the railroad’s coming into being.” The publishers of Harper’s (in a review
