in the Netherlands. A new study led by Matthew Goodwin from University College London finds that "cross border preferences in the EU are less common than in the UK and that, in the context of Brexit, they have become more so. It also suggests that this tendency could be due to continued language segregation." The study includes a unique contribution by the Dutch statistical bureau Ipsos, which researchers have used to analyze around 70,000 party-preferred policies in the wake of the Brexit vote last year. Britons and Europeans Segregate According to Goodwin, a long-standing pattern of political segregation, which remains prevalent in the new EU, could be driving these trends. "As a consequence, the preferences of one of the two countries can dominate the preferences of the other — and in the context of the UK-EU negotiations, this is potentially to Britain's benefit. In particular, we see a strong tendency for some of the UK's nearest neighbors to adopt more similar policies than the rest of the EU — arguably in part a

No matter how you look at it, this game is simply beautiful. Tarnished is polished to the highest standard, combining all of the features of an MMORPG, with the beautifully drawn environments and artwork that we've come to expect from the style of games carried by the new

---

generation of consoles. The development team was determined to not simply retrofit an outdated style and engine into a modern game, but to use modern ideas and mechanics to build a new fantasy setting on top of the tried and true models of old. When Tarnished is a well-rounded game of its type, and a truly great game at that, it's hard to not see this as a team that's truly on top of the genre. The game has wonderful, combat-oriented systems which remind me of the way the first Final Fantasy games were structured, but bring that system to a more modernized roleplaying game. You can level up your skills, perform abilities and repeat the entire process over and over, using the results of one step to improve your future performance. It's a simple, but effective system, perhaps more for the benefit of newcomers than experienced users, but nonetheless a welcome change from some of the more static systems found in earlier games. To be clear, each character plays differently. Some classes are purely passive, others will actively take part in combat. Some of the classes exist to fill roles for the active players, such as the classes which control movement. Since each class has their own personality, it's important to decide what you want your character to be, and how

---

you'll want them to act. Different players prefer different approaches, and the classes allow for a variety of play styles. I played a dual-wielding warrior who loved to take damage and dish it out with explosive effects. It was a nice, fun style of play for me. Tarnished has a complex system for managing your inventory, which includes a bank, storage rooms, map locations and a shopping area. The main purpose of the bank is to safely store items so that you can retrieve them later. The map locations represent the various locations you can visit while adventuring, and each one will have a series of shopping areas where you can sell your items. While you're adventuring, you'll often be able to acquire the items you need through quests or through trades with other players, at which point you'll use these items to craft new gear, and then continue. Crafting was a fairly complex process, using a bff6bb2d33
