We are a group of individuals who live together in one house. We live in a special bubble in which we are still a family as a unit (husband/wife, children, and domestic partner) but, in reality we are in a minority. We don't "count" as a family in the mainstream....and we are tired of being treated that way. The real truth is that we don't fit into any box. We see ourselves as friends first but we identify as a family. We have two children, a husband and a wife, and a domestic partner. So what? Because in our home our husband and wife are "one flesh" so how can we live in a home that is not a family? When families are not allowed to live together it affects children. One reason is because they (children) don't know how to live this type of family life. In reality, we are all family and should be treated as such. Will authorities give us special help because of our special status? NO. The state will not care because we are a minority group. The state will only care for families. The state knows that only families can support each other. Here are some suggestions from other states that should apply to us 0cc13bf012
